Notice Regarding Technical Center Box Issue Fee Mailings

The Office will begin mailing address labels with the PTOL-85, "Notice of Allowance and Issue Fee Due" for patent applications allowed in all Technology Centers. These address labels should be used to ensure proper routing of post-allowance correspondence. This directive supersedes the "Special Boxes for Patent Mail" instruction. Any Notice of Allowance and Issue Fee Due received without the accompanying address labels should continue to be addressed to Box Issue Fee.

RIN 0651-AB01

Revision of Patent Fees for Fiscal Year 2001

AGENCY: United States Patent and Trademark Office, Commerce.

ACTION: Final Rule.

SUMMARY: The United States Patent and Trademark Office (USPTO) is amending the rules of practice in patent cases, Part 1 of title 37, Code of Federal Regulations, to adjust certain patent fee amounts to reflect fluctuations in the Consumer Price Index (CPI). The USPTO is also amending the description of two fees to reflect current business practice.

EFFECTIVE DATE: October 1, 2000.

FOR FURTHER INFORMATION CONTACT: Matthew Lee by telephone at (703) 305-8051, by fax at (703) 305-8007, or by e-mail at matthew.lee@uspto.gov.

SUPPLEMENTARY INFORMATION: This final rule adjusts our fees in accordance with the applicable provisions of title 35, United States Code, as amended by the Consolidated Appropriations Act, Fiscal Year 2000 (which incorporated the Intellectual Property and Communications Omnibus Reform Act of 1999) (Public Law 106-113).

BACKGROUND:

Statutory Provisions

Patent fees are authorized by 35 U.S.C. 41 and 35 U.S.C. 376. A fifty percent reduction in the fees paid under 35 U.S.C. 41(a) and (b) by independent inventors, small business concerns, and nonprofit organizations who meet prescribed definitions is required by 35 U.S.C. 41(h)(1).

Subsection 41(f) of title 35, United States Code, provides that fees established under 35 U.S.C. 41(a) and (b) may be adjusted on October 1, 1992, and every year thereafter, to reflect fluctuations in the CPI over the previous twelve months.

Subsection 41(d) of title 35, United States Code, authorizes the Director to establish fees for all other processing, services, or materials related to patents to recover the average cost of providing these services or materials, except for the fees for recording a document affecting title, for each photocopy, for each black and white copy of a patent, and for library services.

Section 376 of title 35, United States Code, authorizes the Director to set fees for patent applications filed under the Patent Cooperation Treaty (PCT).

Subsection 41(g) of title 35, United States Code, provides that new fee amounts established by the Director under section 41 may take effect thirty days after notice in the Federal Register and the Official Gazette of the United States Patent and Trademark Office.

Fee Adjustment Level

The patent statutory fees established by 35 U.S.C. 41(a) and (b) will be adjusted on October 1, 2000, to reflect any fluctuations occurring during the previous twelve months in the Consumer Price Index for all urban consumers (CPI-U). In calculating these fluctuations, the Office of Management and Budget (OMB) has determined that the USPTO should use CPI-U data as determined by the Secretary of Labor. In accordance with previous fee-setting methodology, the USPTO uses the Administration's projected CPI-U for the twelve-month period ending September 30, 2000, which is 2.68 percent. Based on this projection, patent statutory fees will be adjusted by 2.68 percent.

Certain patent processing fees established under 35 U.S.C. 41(d), 132(b), 376, and Public Law 103-465 (the Uruguay Round Agreements Act) will be adjusted to reflect fluctuations in the CPI.

Four patent service fees that are set by statute will not be adjusted. The four fees that are not being adjusted are the assignment recording fee, printed patent copy fee, photocopy charge fee, and library service fee.

The fee amounts were rounded by applying standard arithmetic rules so that the amounts rounded would be convenient to the user. Fees of $100 or more were rounded to the nearest $10. Fees between $2 and $99 were rounded to an even number so that any comparable small entity fee would be a whole number.

General Procedures

Any fee amount that is paid on or after the effective date of the fee increase will be subject to the new fees then in effect. For purposes of determining the amount of the fee to be paid, the date of mailing indicated on a proper Certificate of Mailing or Transmission, where authorized under 37 CFR 1.8, will be considered to be the date of receipt in our office. A Certificate of Mailing or Transmission under § 1.8 is not proper for items which are specifically excluded from the provisions of § 1.8. Items for which a Certificate of Mailing or Transmission under § 1.8 are not proper include, for example, for filing of Continued Prosecution Applications (CPAs) under § 1.53(d) and other national and international applications for patents. See 37 CFR 1.8(a)(2).

Under 37 CFR § 1.10(a), any correspondence delivered by the "Express Mail Post Office to Addressee" service of the United States Postal Service (USPS) is considered filed or received in our office on the date of deposit with the USPS. The date of deposit with the USPS is shown by the "date-in" on the "Express Mail" mailing label or other official USPS notation.

To ensure clarity in the implementation of the new fees, a discussion of specific sections is set forth below.

Discussion of Specific Rules

37 CFR 1.16 National application filing fees.

Section 1.16, paragraphs (a), (b), (d), and (f) through (i), are revised to adjust fees established therein to reflect fluctuations in the CPI.

37 CFR 1.17 Patent application processing fees.

Section 1.17, paragraphs (a)(2) through (a)(5), (b) through (e), (m), (r), and (s), are revised to adjust fees established therein to reflect fluctuations in the CPI.

37 CFR 1.18 Patent issue fees.

Section 1.18, paragraphs (a) through (c), are revised to adjust fees established therein to reflect fluctuations in the CPI.

37 CFR 1.20 Post-issuance fees.

Section 1.20, paragraphs (e) through (g), are revised to adjust fees established therein to reflect fluctuations in the CPI.

37 CFR 1.21 Miscellaneous fees and charges.

Section 1.21, paragraph (a)(6), is revised to amend the description to reflect current business practices.

37 CFR 1.492 National stage fees.

Section 1.492, paragraphs (a), (b), and (d), are revised to adjust fees established therein to reflect fluctuations in the CPI.

Other Considerations

This final rule contains no information collection within the meaning of the Paperwork Reduction Act of 1995, 44 U.S.C. 3501 et seq. This final rule has been determined to be not significant for purposes of Executive Order 12866. This final rule does not contain policies with Federalism implications sufficient to warrant preparation of a Federalism Assessment under Executive Order 13132 (August 4, 1999).

Prior notice and opportunity for public comment for patent fee changes are not required by the Patent Statute or the Administrative Procedure Act. While the Patent Statute specifically requires that changes to patent fees shall not take effect "until at least 30 days after notice of the fee has been published in the Federal Register and in the Official Gazette of the United States Patent and Trademark Office." 35 U.S.C. 41(g), the statute does not require any additional publication of proposed fee changes. In addition, changes in patent fees are exempted from the notice of proposed rulemaking requirements of the Administrative Procedure Act under 5 U.S.C. 553(a)(2), as the establishment of fee amounts is a matter related to agency management.

As prior notice and an opportunity for public comment are not required pursuant to 5 U.S.C. 553, or any other law, the analytical requirements of the Regulatory Flexibility Act, 5 U.S.C. 601 et seq., are inapplicable.

A comparison of existing and new fee amounts is included as an Appendix to this final rule.

Change in Policy of Examiner Assignment in *Ex Parte* Reexamination Proceedings and Establishment of Patentability Review Conferences in *Ex Parte* Reexamination Proceedings

Effective immediately, the United States Patent and Trademark Office (USPTO) is implementing the following two changes in *ex parte* reexamination practice:

I. Examiner Assignment Policy: It will be the general policy of the USPTO to assign *ex parte* requests for reexamination of a patent to an examiner different from the examiner(s) who examined the patent application.

II. Patentability Review Conference: A "patentability review conference" will be convened in each *ex parte* reexamination proceeding (1) just prior to issuing a final rejection, and (2) just prior to issuing a Notice of Intent to Issue Reexamination Certificate (NIRC).

These changes in the policy of examiner assignment and the introduction of the patentability review conference are directed specifically to *ex parte* reexamination practice, including an *ex parte* reexamination proceeding merged with a reissue application. They do not apply to proceedings under the newly enacted *inter partes* reexamination statute nor to merged *ex parte-inter partes* reexamination proceedings. Similar policies are, however, being considered for proceedings under the recently enacted *inter partes* reexamination statute, including merged *ex parte-inter partes* reexamination proceedings. *See* Notice of proposed rulemaking, Rules to Implement Optional Inter Partes Reexamination Proceedings, 65 Fed. Reg. 18154, 18157-58 (2000), 1234 OG 93, 96 (2000), Response to Issue 4. Specific guidance as to policies, practices and procedures as they will apply to *inter partes* reexamination proceedings will be forthcoming in a separate O.G. Notice to be published in conjunction with the final rules on *inter partes* reexamination.

I. Examiner Assignment Policy in *Ex Parte* Reexamination Proceedings

A. Background

After a request for *ex parte* reexamination is received by the USPTO, the reexamination request is forwarded to the appropriate Technology Center (TC) and then to the TC Art Unit in which the reexamination proceeding is to be examined. Normally, the Art Unit that currently examines the class and subclass in which the patent to be reexamined is currently classified will conduct the reexamination. The reexamination request is then assigned by the Supervisory Patent Examiner (SPE) of the Art Unit to an examiner familiar with the claimed subject matter of the patent. That examiner will be referred to as the "examiner in charge" of the reexamination.

Historically, the examiner chosen by the SPE has generally been the original examiner who examined the patent for which reexamination is requested. When the original examiner has been available, he or she has been presumed to be the examiner most familiar with the technology and prosecution history of the patent. Statistics compiled by the USPTO do not support the existence of any significant difference in the rate of reaffirming the patentability of claims, whether the cases are assigned to the original examiner or to a different examiner. The public, however, has voiced complaints that a perception of "original examiner bias" exists.

B. Implementation of New Examiner Assignment Policy in *Ex Parte* Reexamination

In view of the public perception of "original examiner bias," the USPTO is changing its practice for assigning *ex parte* reexamination requests to an examiner. Henceforth, the general policy of the USPTO will be to assign all such *ex parte* requests, which are filed after the date of this notice, to an examiner different from the examiner(s) who examined the patent application.

Exceptions to this general policy include cases where the SPE is the only Primary Examiner in the Art Unit, or where the original examiner is the only examiner with adequate knowledge of the relevant technology. In the unusual case where there is a need to assign the request to the original examiner, the assignment must be approved by the TC Group Director and so indicatedin the decision on the request for reexamination order.

C. Consequences of Inadvertent Assignment to an "Original Examiner"

Should a reexamination be inadvertently assigned to an "original examiner," the patent owner or the third party requester who objects must promptly file a paper alerting the USPTO to this fact.Any request challenging the assignment of an examiner to the case must be made within two months of the first Office action or other Office communication indicating the examiner assignment, or reassignment will not be considered. Reassignment of the reexamination to a different examiner will be addressed on a case-by-case basis. In no event will the assignment to the original examiner, by itself, be grounds for vacating any Office decision(s) or action(s) and "restarting" the reexamination.

II. Patentability Review Conferences in *Ex Parte* Reexamination Proceedings

A. Background

Currently, reexaminations are monitored by Special Program Examiners in each Technology Center. Prior to the issuance of the reexamination certificate, all reexamination proceedings are screened for obvious errors and to ensure that the record has been prepared properly. This screening is currently performed in the Office of Patent Legal Administration. In addition, the Office of Patent Quality Review conducts a patentability review in a sample of reexamination proceedings.

Reexaminations often involve patents in litigation, and the outcome for the patent owner and for the patent challenger can be dispositive. The USPTO and the public share the concern that the reexaminations should be conducted at the highest possible level of quality. Accordingly, the USPTO will conduct "patentability review conferences" to enhance the quality of *ex parte* reexamination proceedings. The patentability review conferences will provide substantive review of all the issues before the examiner, thereby enhancing objective analysis and quality in the *ex parte* reexamination proceeding.

B. Implementation of Patentability Review Conference in *Ex Parte* Reexamination:

Effective immediately, a "patentability review conference" will be convened in each pending *ex parte* reexamination proceeding (1) just prior to issuing a final rejection, and (2) just prior to issuing a Notice of Intent to Issue a Reexamination Certificate (NIRC). These are the two most critical events in reexamination proceedings. Each conference will provide a forum to consider all issues of patentability as well as procedural issues having an impact on patentability.

C. Make-up of the Patentability Review Conference

The patentability review conference will consist of three members, one of whom may be the SPE. The first member will be the examiner in charge of the proceeding. The SPE will select the other two members, who will be examiner-conferees. The examiner-conferees will be Primary Examiners, or examiners who are knowledgeable in the technology of the invention claimed in the patent being reexamined, and/or who are experienced in reexamination practice.The majority of those present at the conference will be examiners who were not involved in the examination or issuance of the patent. An "original" examiner should be chosen as a conferee only if that examiner is the most knowledgeable in the art, or there is some other specific and justifiable reason to choose an original examiner as a participant in the conference.

The patentability review conference will be similar to the appeal conference presently carried out prior to the issuance of an examiner's answer following the filing of a Notice of Appeal and Brief. See MPEP 1208. A patentability review conference must be held in each instance where a final rejection is about to be issued in a reexamination proceeding. A patentability review conference must be held in each instance where an NIRC is about to be issued, unless the NIRC is being issued: (1) following and consistent with a decision by the Board of Patent Appeals and Interferences on the merits of the proceeding, or (2) as a consequence of the patent owner's failure to respond or take other action where such a response or action is necessary to maintain pendency of the proceeding and, as a result of which failure to respond, all of the claims will be canceled. When the patentability review conference results in the issuance of a final rejection or an NIRC, the two conferees will place their initials, followed by the word "conferee," below the signature of the examiner. The signature of the examiner and initials of the conferees on the resulting Office action will reflect that the patentability review conference has been conducted.

D. Consequences of Failure to Hold Conference

Should the examiner issue a final rejection or NIRC without holding a patentability review conference, the patent owner or the third party requester who wishes to object must promptly file a paper alerting the USPTO of this fact. Any challenge of the failure to hold a patentability review conference must be made within two months of the Office action, or the challenge will not be considered. Convening the conference to reconsider the examiner's decision will be addressed on a case-by-case basis. In no event will the failure to hold a review conference, by itself, be grounds for vacating any Office decision(s) or action(s) and "restarting" the reexamination proceeding.

E. Discussion

Review of the patentability of the claims by more than one Primary Examiner should diminish the perception that the patent owner can disproportionately influence the examiner in charge of the proceeding. The conference will also provide greater assurance that all matters will be addressed appropriately. All issues in the proceeding will be viewed from the perspectives of three examiners. What the examiner in charge of the proceeding might have missed, the other two conference members would likely detect. The conference will provide for a comprehensive discussion of, and finding for, each issue. The present initiative limits the use of the multiple examiner conference review to the two most critical points in the proceeding: (1) where the examiner decides whether to issue a final rejection of claims, and (2) where the examiner decides whether to issue an NIRC to confirm or allow claims. Thus, this initiative provides the advantage that the proceeding will be looked at by three "pairs of eyes" at the most important points in the reexamination, without expending an inordinate amount of resources and without unduly delaying the proceeding.

Incorporation into the Manual of Patent Examining Procedure (MPEP):

The "Examiner Assignment Policy" and "Patentability Review Conference" initiatives, as well as their particulars, will be incorporated into the MPEP in due course.

Fax Automation in Technology Center 1700

In early April of 2000, Technology Center 1700 (TC 1700) deployed a pilot program that automates the routing of incoming fax transmissions and provides an acknowledgment of Official fax communications received in Technology Center 1700. Deployment of this system to other Technology Centers will begin later in calendar year 2000.

The goal of the pilot program is to improve service to customers and the efficiency with which fax communications are processed within Technology Center 1700. These goals will be achieved by reducing the need for retransmission of lost Official faxes and by providing faster delivery of draft and informal communications to the examiners by eliminating prior manual sorting and delivery steps. The pilot uses a computer-based fax server that routes and stores fax transmissions based upon the incoming United States Patent and Trademark Office (USPTO) telephone number. Faxes sent to Official fax numbers would be stored electronically for 9 months or until a printed paper copy is made of record in the patent application file. An Official communication that lacks some formality such as a signature or fee will be treated as an Official fax unless explicitly identified as a draft or informal communication. A fax that is sent to an Official fax number would be rerouted to an Unofficial fax number if it were identified as a draft or informal communication. Faxes that are sent to fax numbers not designated as "Official," or rerouted to such numbers, will not be stored on the fax server after being deleted by the recipient. Although the faxes are received and stored on the server, they appear to PTO users as if they are being received on their workstation or a technology center printer. Official fax submissions will be routed to central printers in Technology Center 1700 for printing and matching with the application files.

An acknowledgment confirming receipt of the fax by TC1700 will be transmitted to the sender's fax number. The acknowledgment will be sent only for the Official fax telephone numbers. Customers can thus be assured that their faxes are being received. The acknowledgment receipt will be fax transmitted back to the sending fax machine. The fax server can only be programmed to obtain a telephone number from the customer's sending machine fax ID. Customers must ensure that their fax machines or software are configured to transmit accurate ID data including the fax telephone number. The transmission of a receipt will be attempted soon after an Official fax transmission is received. Five attempts will be made to transmit the receipt if the line is busy and three attempts will be made if there is no answer. The receipt will indicate the date and time of receipt at the USPTO of each fax transmission and the number of pages received. If an incorrect telephone number is provided in the fax ID or a fax connection cannot be established, no receipt will be sent. Because the receipts are automatically generated by the software, we are unable to provide replacement receipts. Nor can receipts be generated for faxes that are rerouted from one fax number to another fax number.

When an Official fax is entered into a patent application file, a corresponding content entry will be recorded in the Patent Application Location Monitoring (PALM) systems records for that application. PALM is a USPTO computer records system that lists the status and content of each patent application. Matching faxes with an application file and updating PALM should be expected within two weeks of the date of receipt of the fax in TC 1700. Status and content information for patent applications in PALM are available to applicants and their representatives with the Patent Application Information Retrieval system (PAIR). See 65 Fed. Reg. 10762 (Feb. 29, 2000). PAIR is a USPTO system available through the Internet for providing confidential status and content information about patent applications to applicants and registered practitioners. Enrollment information and downloadable software for PAIR can be found on the USPTO's web site at http://pto-ebc.uspto.gov/newusers.html. Thus, PAIR can be used to determine if an Official fax submission (or any paper) has been entered into the application file. Draft proposal communications sent to examiners will not be recorded into PALM; hence, there will be no corresponding PALM record to view with PAIR.

A customer may infer that an Official fax is lost if a PALM content entry for the fax is not recorded into PALM within two weeks of the transmission of the fax. For customers who do not use PAIR, they may suspect that the fax is lost if no communication is received within 30 days plus normal mail time for "After Final" amendments or 3 months plus normal mail time for other amendments. If a customer is thinks that his/her Official fax is lost, he/she can request that a new copy be printed and matched with the application file. Requests for reprinting the fax should be directed to the customer service representative for TC 1700. Customers can assist in locating faxes if upon request they provide either a copy of the acknowledgment receipt or the date and time of transmission, number of pages transmitted, sender's fax telephone number, and the pilot fax telephone number used.

Customer service should be improved since the automated system retains an electronic copy of each Official fax received at an Official fax number at least until the printed paper is made of record in the application file. The electronic copy will be used, if needed, to reduce the necessity for resubmission of lost faxes. The pilot program will not eliminate all lost faxes, since some faxes are lost due to transmission errors making the fax document received unusable.

A select group of examiners in Technology Center 1700 will also be participating in another aspect of the pilot program. The participating examiners will be able to use special fax numbers for receiving draft or informal fax communications that can be viewed and printed directly at an examiner's workstation. Examiners participating in the pilot program will provide their direct fax number during telephone interviews with their customers. Participating examiners will also be able to send draft communications by fax from their workstations when necessary to supplement telephone communications. The pilot program should improve customer service and efficiency by allowing participating patent examiners to respond more quickly to draft communications, which will presage the migration of automated fax capabilities to the rest of the USPTO.

New fax numbers are being used for the pilot program in Technology Center 1700 as follows:

-All Official Final replies for applications assigned to Technology Center 1700 should be sent to 703-872-9311.

-All other Official communications should be faxed to 703-872-9310.

-Direct fax numbers to examiner PCs will be provided by participating examiners.

An examiner's direct fax number should only be used for direct communications requested by the examiner, e.g., draft proposals. The direct fax number should not be used for routine transmission of amendments or replies to Office actions.

The old fax telephone numbers for Technology Center 1700 will remain operational but they are not connected to the new automated fax system. The new fax numbers should be used whenever possible.

Problems with fax communications should be directed to the customer service representative for Technology Center 1700 at 703-306-5665.

Questions and comments may be directed to Patrick Ryan at 703-308-2383 or by e-mail to patrick.ryan@uspto.gov.

Reference Collections of U.S. Patents and Trademarks
Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information from the U.S. Patent and Trademark Office. Many PTDLs have on file patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PTDLs receive both the patent and trademark sections of the *Official Gazette of the U.S. Patent and Trademark Office* and numerical sets of patents in a variety of formats. Patent and trademark search systems in the Cassis CD-ROM series are available at all PTDLs to increase access to that information. It is through the CD-ROM systems and other depository materials that preliminary patent and trademark searches may be conducted through the numerically arranged collections.

Each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials.

All information is available for use by the public free of charge. However, there may be charges associated with the use of on-line systems, photocopying and related services.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

Partnership PTDLs provide enhanced and expanded services for which fees are charged. They offer on-line patent text and image searching, on-line trademark searching, and videoconferencing for examiner interviews and workshops. They accept disclosure documents on site, order file wrappers, assignment documents and certified copies for their customers, and host a variety of seminars aimed at specific audiences, including practitioners, paralegals, and independent inventors. Currently, partnerships are located at the Great Lakes Patent and Trademark Center (GLPTC) at the Detroit Public Library in Detroit, Michigan, the Sunnyvale Center for Innovation, Invention and Ideas (SCI[3]) at the Sunnyvale Public Library in Sunnyvale, California and at the South Central Intellectual Property Partnership at Rice (SCIPPR) at the Fondren Library of Rice University in Houston, Texas.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
